

Transforming a Dying New Construction Lawn into a Lush Green Turf in Forest Hill, Maryland

Date

Monday, October 30, 2023

Introduction

Our clients in Forest Hill, Maryland, were struggling with a lawn that was losing its luster. Despite their best efforts, their lawn was not thriving as they had hoped. This nearly new lawn had only been installed months prior once the house was built. They reached out to us to review their options and bring their lawn back to life.

Services Executed

- Comprehensive Lawn Analysis
- Soil Testing
- Soil Amendments
- Kill-Off of existing turf
- Added in additional topsoil and organic matter
- Full multi-pass seeding

Initial Consultation

We met with our clients at their residence for an initial consultation. They expressed their concerns about the lawn's health and appearance. After a comprehensive lawn analysis and soil testing, we realized how depleted the current conditions of their soil was. We recommended adding adequate healthy soil and organic matter as the key step to a new beautiful yard!.

Implementation

This project was a multi-step effort to achieve the quality of lawn they desired. Our team rebuilt the soil structure of the yard and performed a complete new install seeding with premium Turf Type Tall-Fescue seed at 10lbs/M. After that starter fertilizer was incorporated.

Results

After three months of consistent care and following our program, our clients were thrilled to see a dramatic transformation. Their lawn is now lush, green, and free of weeds and pests.

Client Testimonial

"This is the type of lawn we were hoping for with our new house, and we finally have it! We are so pleased with the services and the fantastic results. Highly recommend MADBAR Outdoors!"

Conclusion

If you're in the Harford or Baltimore County Maryland area and are looking to transform your lawn, look no further. Contact us today to schedule a consultation and let us help you achieve the lawn of your dreams.
